

Study Materials:

The college provides well-planned and published study materials in book form to the students. These study materials are prepared by a team of experienced faculty members under the guidance of the Principal and Course-Coordinator. The study materials are very useful as the concepts are narrated in a lucid manner, varieties of problems are solved, and problems for practice are also given.

Proctorial system:

To make the system more effective, the college has implemented proctorial system. Each faculty member is in charge of a group of 10 students to look after each and every problem of the group including personal, health and academic.

Co-curricular Activities:

A splash of co-curricular activities with academics makes a vibrant canvas to display the talents of the

students bringing with it a refreshing change in everyday academics. It also nurtures students' versatility and grooms them for the world helping to build their personality. Group discussions, debates, study visits, language club, science club, sports etc. break the classroom monotony too.

Study Visits and Guest Lectures:

In today's dynamic world, it is essential that classroom teaching is illustrated by practical demonstrations. Visits to various industries and laboratories and also lectures by eminent professional faculty expose students to the real world situations where they are likely to find themselves in during graduation. All these year long activities compliment classroom teaching.

Language Club:

Effective communication is an important trait and is an essential ingredient of one's personality. This is cultivated through the language club by way of conducting debates, conversations, group discussions, quiz, JAM, elocution etc.

Hostel and Students Life:

Present day residential system is just a replication of the ancient Gurukul system. The college is trying to revive this glorious tradition. Young people are susceptible to become friend-centered. Acceptance and belonging to a peer group can become almost supremely important. In this system, the students cultivate the habits of making friends, adjust themselves with others, develop independent thinking and do their own work. Academia International College of Science provides comfortable hostel facility for boys and girls in the vicinity of the college. Hostels have attached mess which serves standard food as per the menu by students committee. Students have to stay in the hostel to cope with the demanding academic requirement.

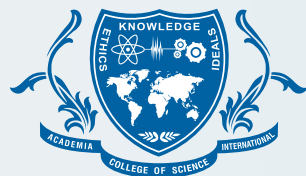

Personal Counseling & Guardian Teacher Interaction:

The adolescence brings with it lots of curiosities, doubts, queries, difficulties. More over students staying away from home need time to adjust with new surroundings and many a times these transitions are difficult. Personal counselling (one to one session) with each student, help address these issues on time. This enriches the student teacher bond and minimizes the problems of the students. Every teacher has a group of students to parent and counsel. This has helped us a great deal not only in timely solutions but also in developing long lasting bonds.

Competitive Pattern?

The entire course is to be completed in two academic sessions. In each session there will be fixed component of academic teaching (CHSE pattern) and competitive teaching.

The classes for competitive examinations are conducted in such a manner that entire syllabi are covered from Medical (AIPMT) / Engineering (JEE Main /Advance) point of view. Also regular weekly tests are conducted at National level to evaluate the performance of students and also to give them exposure to the competitive height of Medical / Engineering Entrance Exam.

The performance report of students conducted by Institute are sent to the parents / Guardians through SMS on regular basis.

It is our experience that those students who aspire for a bright carrier in Medical /Engineering should start preparation from class XI.

Why Academia International ?

- Unique Academics system.
- Impeccable Administration.
- Strict disciplinary rules followed by teachers, students, Admin staff.
- Regular and periodic assessment of students performance and their difficulties throughout the session.
- Reporting to the parents regarding their ward's performance through SMS on regular basis.
- Integrated teaching approach.
- Competitive environment.
- Motivation classes.
- Homely atmosphere.
- Amazing results since its inception.

Highlights:

- Homely atmosphere and school like discipline.
- Highly qualified and experienced faculty.
- Revision classes for clarification of doubts.
- Regular CHSE pattern teaching in synchronization with intensive Coaching for jee main /jee Advance /AIPMT.
- Special emphasis on communicative English for students coming from Odia Medium(10th) background.
- Minimum study burden at home.
- Outside Tuition / Coaching not required.
- Chapter wise Class test in CHSE & Entrance Examination Pattern.
- All India online test for JEE Main, JEE Advance, AIPMT, Entrance examinations.

Science... Discover humanity through the world of Science:

Scientific temperament is essential to live a fruitful enriched life. The study of science helps to answer the 'Why', 'What' and 'how' in the students minds. Mankind since the primitive stage has been mazed and intrigued by the mystique of science. We believe in teaching science, integrating various creative methodologies to help students understand science better. Committed faculty nurture the young curious minds making learning interesting, motivating and intellectually stimulating.

The Dadhichi groups of Institutions was established in the year 2004, primarily to develop self motivated leaders to be successful in the challenging and vibrant global economy. The Dadhichi family has blossomed into a bouquet of academic institutions in a number of disciplines such as M. PHARM, B. PHARM, D. PHARM, ITI, DIPLOMA ENGINEERING, and Advanced Studies & CBSE Schools. Students from all parts of India are pursuing education at the various Dadhichi Group of Institutions.

The college has hostel facility as well as day-boarding facility. For day-boarding students transport facility, Lunch and refreshment, reading room are available. It has its own sophisticated campus with canteen, playground, 24 hours power supply, stationery store, broadband internet facility etc.

Residential system:

Present day residential system is just a replication of the ancient Gurukul system. The college is trying to revive this glorious tradition. Young people are susceptible to become friend-centered. Acceptance and belonging to a peer group can become almost supremely important.

In this system, the students cultivate the habits of making friends, adjust themselves with others, develop an independent thinking and do their own work.

Council examination:

The first requirement of a student continuing +2 Science is to do well in the Council Examination. Therefore the number of theory classes allotted here is more than the double of the classes allotted in other colleges.

College also conducts doubt clearing classes and tutorial classes for the benefit of the students. Regular Examination based on council pattern is held, properly evaluated, discussed in the class by the respective faculty members and papers shown to the students. Progress reports are regularly sent to the parents/guardians.

Laboratories:

Well equipped laboratories with latest instruments, equipments & facilities satisfy every need of the students and give plenty of experience and exposure. Students have ample laboratory time to amiliarize

themselves with every instrument individually. Well-designed experimental kits along with manuals, Bi-visual charts, models and experimental write ups supplement of every experiment and help to understand concepts with greater clarity.
